

Technology for Success (T4S) Critical Thinking Activities Instructor Tool Kit

INSTRUCTOR TOOL	WHAT IS IT FOR?	RECOMMENDED USE
BY MODULE OVERVIEW download	A Word document summarizing each narrative module's objectives and the corresponding non-narrative activities to use for critical thinking exercises: 1. Critical Thinking Challenges 2. Technology for Success Concept Video	Instructors can use this brief overview to help plan their assignments (e.g. selecting the modules that they want to cover or the sequence)
Critical Thinking Challenge: DECISION-MAKING PATH 1. MAP Diagram download 2. PowerPoint download	MAP DIAGRAM A document that details the design of the exercise, illustrating the decision-making path and each scenario. POWERPOINT Also available is a version that is in a more visual presentation format.	Instructors can view the full landscape of the T4S Critical Thinking Challenge exercises. The map and PowerPoint help you to anticipate all possible paths that a student could choose and its corresponding outcome/result.
Critical Thinking Challenge: MENTORING GUIDE RUBRIC download	A matrix that breaks down each possible outcome of various decisions/paths that a student could take. Prescribes a strategy and recommended guidance that an instructor can give a student based on the specific decision path chosen.	Instructors can view (1) high level tips by module and (2) strategies for each step in the module to guide students on how to choose the optimal path. The Guide can be used as instructors are reviewing results and/or as students are completing the CTCs, possibly as an in-class activity. It can aid the instructor in determining where in the path the student deviated from the optimal path and how to help the student get on track.
